

Agenda

What was accomplished

- Created discord for contact
- Had a meeting with the client and discussed what the project is and the requirement
- Each team member was assigned what to do and do research on
- Created a Trello board to complete tasks
- Team created GitHub account.
- Team committed minutes/and client minutes, A starter documentation
- OCR was displayed and team saw how data could be extracted from a receipt
- Team created AWS account

What we want to accomplish in next weeks

- Continue with the blueprint of the project
- Integrate our design concepts
- Developing more of the OCR for the receipt reader
- Talk with the client if they have preference how the AWS and OCR should be connected.
- Basically, want to accomplish part 1 of the project to move on to part 2
- Doing more on documentation
- Starting on the SRS for the group one the end of the week
