Environments Requirements

1. Project requires either windows 10 or 11.
2. Project works on macOS version 13 and above.
3. Project is going to install expo when running the program, requiring a minimum storage capacity of 50 MB.
4. Project works on iPhone 8 and above, and on latest Android phones.
5. Version above 12.4 for iPhone, and version above 5 for android will work.
6. Project requires to be in the same connectivity as the pc you're running the project. Before scanning the QR code by a phone, checking the phone and the pc you're scanning the QR code has the same connectivity.
7. The connectivity must be secure and private. Project won't work on public WIFI. Only works on private WIFI's.
8. Project needs a fast CPU when running the code on a computer. In the last 8 years manufactured CPUs will work.
